

**Hand book of Neurological
Physical therapy-Evidence
Based Practice. ShanmugaRaju P.**

Jaypee Brothers Medical Publishers (P) Ltd,
New Delhi, 2012. 143 pp, ISBN 978- 93-5025-553-7.

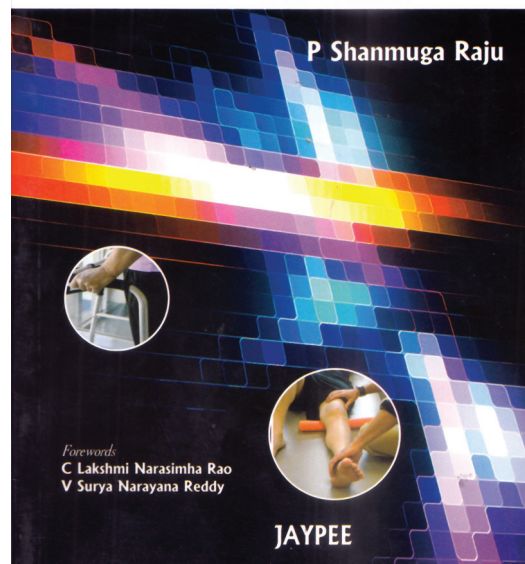

Hand book of Neurological Physical therapy- evidence based practice authored by Dr. P. ShanmugaRaju, Asst. Professor & I/C Head Department of Physiotherapy is conceived as a source of information about various diseases in concise form for physiotherapy students and rehabilitation professionals. This book is intend for undergraduate, postgraduate students in physiotherapy and clinical practitioners. The author has used simple language and the sentences are short, making the book readable. The coverage of the topics is clear.

This handbook of neurological physical therapy can be divided into neurological examination, neuroradiology imaging, physical therapy and rehabilitation in neurological disorders with special emphasis on orthotics in neuro rehabilitation. There are more than 90 clinical photographs, and sufficient number of tables. This book is selected as reference book in the East Carolina University, University of WollongGong (Gwynneville,NSW), Universiti Malaysia Sabah, Japanese library and the University of Sydney, Australia.

The author has put his experience by providing appropriate information in all chapters. This book will be helpful to the undergraduate & postgraduate students in physiotherapy and clinical practitioners. I recommend this book as a reference guide to be kept in all physiotherapy and medical Institutions.
